

THE BEAUTY OF PEACE OF MIND

MARVIN HOME AUTOMATION

LOCK STATUS SENSOR

MARVIN 
Windows and Doors
Built around you.®

The new Marvin® Lock Status Sensor brings smart home capabilities to Marvin windows and doors. The Lock Status Sensor is a fully integrated, factory-prepped solution that's ready for wired or wireless connectivity. This means that every window and door equipped with it is delivered to the jobsite ready to install without the need for after-market modification. This simple, affordable solution indicates if a panel or sash is closed and locked or unlocked, enhancing peace of mind without compromising aesthetics. The Lock Status Sensor is the easiest way for builders to deliver ultimate peace of mind to their customers.

FEATURES AND BENEFITS

INSTALLATION

You don't have to have special knowledge or experience with these systems to install a window or door equipped with the Lock Status Sensor. It truly is a "Plug and Play" solution.

When Marvin designed the Lock Status Sensor, they weren't just thinking about homeowners. They were thinking of the builders, installers and integrators as well. So they made the installation process as easy and intuitive as the solution itself. There is no need to worry about drilling into a new window, voiding the warranty and having to cover the cost of replacement. All the prep work has been done. And, unlike with other manufacturers, there are no unsightly plastic covers or visible components to interfere with the beautiful aesthetics or performance of Marvin windows and doors.

* The Lock Status Sensor detects an open or closed status on Clad Ultimate Double Hung - Next Generation 2.0 units. A "locked" status is inferred from the presence of the Auto-Lock feature, which activates the locking mechanism when the operating panel is closed.
