# PROVIA® BUILDS DOORS THE PROFESSIONAL WAY

---

ProVia caters to a niche within the door market that demands a high degree of customization coupled with outstanding quality. Our company defines the products that meet this demand as “professional-class.” We have found success by adhering to a set of core values that guide us as we develop rewarding, long-term relationships with our employees, customers and homeowners.

## WHAT MAKES PROVIA PROFESSIONAL-CLASS?

---

### CUSTOM ENTRY SYSTEMS

Today’s off-the-rack doors, which are mass-produced and not customized, often fall short of expectations and performance.

These shortcomings are the driving force behind ProVia’s custom entry doors, built to your exact measurements for a precise fit, protection, security, and energy efficiency. The materials that go into our custom-made doors are premium quality and exceptionally durable, far surpassing the ready-made doors at the big-box hardware stores, and our craftsmanship and care for details can be seen in each door we produce.

**SECURITY** | We ensure the strength and security of every door, so you have peace of mind and can focus on what’s really important - your life.

**DURABILITY** | Crafted with the finest materials and backed by our Lifetime Limited Transferable Warranty, the durability of our products can’t be beat.

**BEAUTY** | A beautiful ProVia entry system will always greet your guests with classic elegance and style.

**ENERGY EFFICIENCY** | Engineered to keep the elements at bay and your home comfortable all year long.

# STEEL DOORS

Legacy Steel features add up to a professional-class product. Whether you select Legacy Woodgrain Textured Steel or Smooth Steel, our entry systems will provide an elegant, durable and energy efficient addition to any home.

## LEGACY SKIN OPTIONS

### CUSTOM WIDTHS & HEIGHTS

Need a little more height or a little less width? We offer customized door and sidelite widths and heights in 1/8" increments.

### CUSTOMIZE BOTH SIDES

You can customize your entry by ordering a different series, style and finish on each side of your door.

Most Legacy Steel Entry Systems are ENERGY STAR® Certified.

Legacy Steel Doors with full-lite or half-lite decorative glass with ComforTech™ glazing will include a pane of Low-E glass in order to be ENERGY STAR certified. This includes the following styles; 150, 230, 239, 240, 350, 430, 437, 439 and 460. Since Low-E glass has a slight color tint, it is recommended that sidelites and transoms are ordered with optional Low-E pane to match the door.

- Available In Custom Frame Depths
- 20-Gauge Steel Security Plate at Strike Area
- Endgrain is Treated to prevent rotting

### FRAMESAVER®

Shrinking and swelling occur from changes in relative humidity in the atmosphere. Water wicks up through wood fibers resulting in paint peeling, rot and mold. Traditional door frames begin to rot within 3-6 months of field installation.

Our finger-jointed composite bottom never absorbs water, warps, cracks or rots, and paints and finishes just like wood. Plus, FrameSaver is backed by the industry's only fully-transferable lifetime limited warranty for ultimate peace of mind.

### FRAME CLADDING OPTION

- PVC Coated Aluminum Cladding
- Match Most of Our Paint Colors
- Pre-Fitted for Custom Frame Depths
- Completely Maintenance Free Exterior
- No Follow-Up Painting is Required
- Now Also Available in Four Smooth Cladding Colors.

### COMPOSITE FRAME OPTION

Our Composite door frame system combines all the strength and convenience of wood with enhanced properties that make it moisture and insect resistant. Composite frame will not absorb or wick moisture and will never rot or splinter.

- Smooth white finish (inside frame rabbet is painted to match inside door color)
- Standard 4 $\frac{1}{8}$ " frame depth
- Available for steel or fiberglass doors
- Available for Single doors, French doors, Sidelites and Rectangle Transoms
- Standard Brickmold, Brickmold with Nailing Fin, 3 $\frac{1}{2}$ " Flat Brickmold, 5 $\frac{1}{2}$ " Flat or Custom Width Flat Brickmold up to 5 $\frac{1}{8}$ "†
- Frame Extensions from 4 $\frac{3}{4}$ " up to 12 $\frac{1}{8}$ "
- Custom Mullion Build-Up between door and sidelite†

## FIRE RATED GLAZING

AVAILABLE IN SINGLE DOORS ONLY. MAX SIZE 36" X 84" NOMINAL

### POSITIVE PRESSURE TESTING

In most fires, the extreme heat can cause drafts causing certain amounts of air pressure pushing against a door. In the past, fire codes required only a neutral (negative) fire test. In this test, there was no pressure on the door. This made it easier to pass the test but did not replicate true fire conditions. Today, almost all building codes require fire doors to have a positive pressure rating. Positive pressure testing is conducted in an environment that best replicates those conditions that are present during an actual fire scenario.
